

| RUG CARE

| THANK YOU

FOR PURCHASING ONE OF OUR SUSTAINABLE SIT-IN CARPETS. FOLLOW THE TIPS IN THIS GUIDE TO MAKE IT SHINE ALL YEAR ROUND!

ORDINARY CLEANING

It is advisable, especially with pets, to do two simple daily operations: Hoover your rug to remove surface dirt and treat stains immediately to prevent them to penetrate deeply into the fibers.

These easy actions will extend the time between deep cleanings, keeping your rug fresh for longer.

EXTRA-ORDINARY CLEANING

In addition to daily maintenance make sure to do a deep cleaning of your rug at least twice a year.

For the treatment, use appropriate detergents according to the material of the rug you are treating, paying close attention to wool materials, which can lose its elasticity and firmness with some detergents. We recommend to use acidic detergents for this purpose.

SMALL STEPS AND MAINTENANCE

If a yarn sticks out don't tear it, but cut it with scissors at the same height as the other ones to avoid damaging the structure of the rug.

In order to protect the rug and avoid undesirable marks on top of it, we recommend you to place rubber pads under the furniture and avoid dragging heavy objects over the rug which can damage the fibers.

TREATMENTS AND STAINS

It is important to choose the right treatments to keep your rug in good condition, preserve the colours and safeguard the fibers.

Check out our guide for quick and effective solutions to all types of stains – remember that time is your best ally!

Take action as soon as possible to keep your rug intact.

QUICK GUIDE AGAINST EVERY STAIN

! INTERVENE ON STAINS AS SOON AS POSSIBLE

TIME TO TREAT STAINS IS CRUCIAL. DO NOT ALLOW DIRT OR LIQUID TO DRY, THE FASTER YOU ACT, THE EASIER IT WILL BE TO REMOVE.

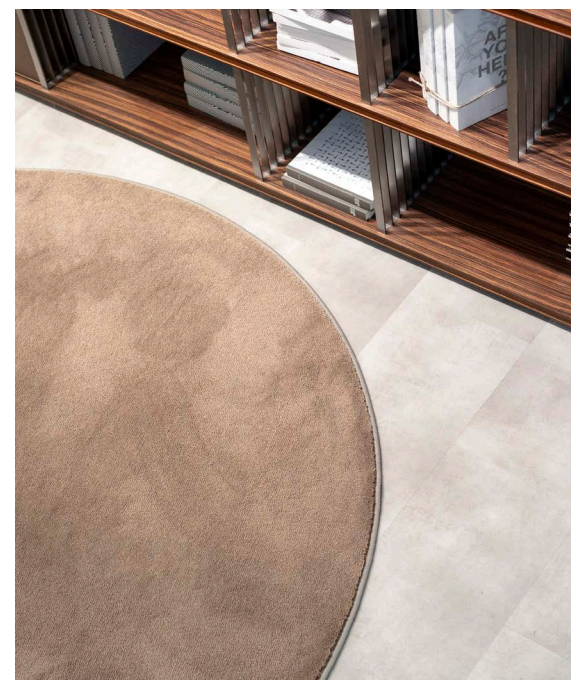

ALCOOL	1	2
